Professional Summary

UX / Product Designer with 3 years of experience designing clear and practical interfaces for SaaS, healthcare, and consumer products. Focused on simplifying workflows, building consistent design systems, and delivering usable product experiences with cross-functional teams.

Experience

2DOT47 — UX Designer | Aug 2024 – Present | Remote

- Designed enterprise workflows for CPQ and PSA products within the Provus suite.
- Maintained a shared SLDS design system to ensure UI consistency across products.
- Designed AI agent workflows to support automation and decision-making scenarios.
- Created scenario-based user flows to reduce user effort and improve task clarity.
- Worked closely with product managers, BAs, engineering, and QA teams.

Triveous — Product Designer | May 2023 – Jun 2024 | Remote

- Improved usability and UI across SaaS and non-SaaS products, contributing to higher user engagement.
- Delivered 7+ product features across multiple products from concept to developer handoff.
- Collaborated with clients and internal teams to align business goals with user needs.

MLS Verifier — Product Designer | Sep 2022 – May 2023 | Remote

- Designed the complete platform experience and visual direction as a founding designer.
- Built and launched the website using Framer with a focus on clarity and performance.
- Conducted user research and usability studies to improve user engagement and boost sales.

Phoenix — UX Intern | Mar 2022 – Sep 2022 | Pune

- Assisted in building UI components and supporting the design system.
- Helped with branding, visual design, and UX tasks under senior designers.

Selected Projects

Provus CPQ — Quoting Application | <https://www.provusinc.com>

Designed end-to-end quoting workflows and SLDS-based UI components.

PSA — Professional Services Automation

Designed resource and project workflows; maintained the MUI design system.

AI COE — Oral Cancer Screening App (IISc) | Google Play

Designed mobile flows for early screening and improved accessibility.

Silvergenie — Elder Care App | Google Play

Designed navigation, service discovery, and emergency interaction flows.

Midas — Clinical Dataset Platform (IISc) | <https://midas.iisc.ac.in>

Planned upload, management, and publishing experiences for clinical datasets.

TheOutpost.ai — AI Tools Directory | <https://theoutpost.ai>

Designed browsing, search, and category-based discovery experience.
